

# Homeowners - Get Involved NOW to Save Club West

The Club West Golf course was once voted one of the top 20 public courses in Arizona.

Actions by the city and the course owner have put our community and lifestyle at serious risk.

Unless a cost effective water solution, new operating model and new owner are found, we are at risk of losing the centerpiece of our community.

Property values could be seriously impacted. The HOA does not have power to sue the golf course owner for damages to homeowners, and/or to purchase or operate the golf course.

We desperately need your help to protect our lifestyle and quality of life.

Save Club West, a NFP Association was formed to protect homeowner interests and create a strategy under new ownership to recover the golf course before all is lost.
