

# **Our golf course was a terrible eyesore this summer**

Watering and play times were cut back in June, maintenance was stopped, the pond was nearly drained, and wildlife around the pond was devastated.

Don't be fooled by the winter over-seeding. Next Spring, the course will be worse. If we do nothing, the course will surely die, like the Lakes golf course and could be repurposed for other uses including homes and apartments.

**The time to act is now.  
Please get involved and help us  
to stop this travesty.**

We are developing a new operating model for the golf course owned by the homeowners.

Tell us if you are interested to become a fractional owner of the golf course or be willing to help defray the annual water costs with homeowner ownership - if our plan makes sense.

Your financial support is vital to complete our analysis and business plan by year end.
